DETAILED ACTION

Allowable Subject Matter

1. Claims 16-25, 27-28 is allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 16, 23, 25 and 28, the prior art of record teaches of a method and radio communication system, of controlling transmit power in a call between a first mobile station and a second mobile station in a radio communication system having a first base station in communication with the first mobile station and a second base station in communication with the second mobile station, said method comprising the steps of: communicating through an uplink connection from the first mobile station to the first base station utilizing an uplink power; communicating through a downlink connection from the second base station to the second mobile station utilizing a downlink power; requesting by the first base station, a first Adaptive Multi-Rate (AMR) coded mode for use on the uplink connection, said first AMR coded mode being associated with an uplink Carrier-to-Interference (C/I) ratio; requesting by the second mobile station, a second AMR coded mode for use on the downlink connection, said second AMR coded mode being associated with a downlink C/I ratio.

The prior art of record fails to teach of determining the connection having the highest associated C/I ratio; and **adjusting either the uplink power or the downlink power to a power level lower than an optimal power level for the connection with**

the highest associated C/I ratio without changing the AMR coded mode for either the uplink connection or the downlink connection.

3. Claims 17-22, 24 and 27 depend on claims 16, 23 and 25; therefore, the examiner gives the same reasons for allowance as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
